About Management Support Network (MSN)

Established in 1999, we are one of the largest independent SR&ED firms in Canada, with offices from coast-to-coast. With all of our experience, we have likely helped one of your customers, suppliers or competitors. Our in-house team of Professional Engineers, Scientists and Tax Specialists have an exceptional track record. CRA has accepted well over 10,000 projects we've written.

We have many, privately-owned clients that receive refunds in the tens of thousands of dollars. We also have several publically traded clients that receive millions of dollars from the SR&ED program.

About our Peer Review Service

For companies that already file for SR&ED, our "peer review" service is an inexpensive way to test drive our capabilities and to identify additional ITC's and unnecessary risk.

Our peer review includes:

1. Reviewing your technical drafts and removing or editing any unclear, unnecessary or ineligible text from the report. At the same time, we identify areas in the report to emphasize;
2. Reviewing the costing associated with the SR&ED claim (ie. checking for compliance and ensuring costing accurately reflects the work described in the technical report);
3. Assessing all activities during the year to ensure no eligible projects or costs are being missed; and
4. Reviewing your SR&ED activity tracking system and identifying areas where it is not CRA compliant

It's not uncommon for us to find hidden SR&ED activities in unusual places which can add upwards of 20% - 100% to an average claim. Similarly, we often correct costing mistakes which can prevent unnecessary CRA audits.

Professional Fees = \$2,500 (for peer reviewing a claim with 5 reports or less).
